

GET HIRED IN HEALTHCARE SECURITY

Start with your immunization records!

Steps to Complete Your Immunization Records

1. Speak with someone in your immediate family to determine if they have your original immunization records from birth for MMR, Varicella, TB
2. Determine if your health benefits cover any or all of the listed immunizations (MMR, Varicella, and TB); if you have OHIP these shots are covered
3. Schedule a blood test to determine immunity or a consultation to review your records
4. Once you have the results, schedule immunization appointments for any outstanding doses
5. Ensure your document is written and stamped in English by a Doctor in Ontario with all dates clearly noted
6. Include the document in your online application or attend an in person hiring event (please do not walk into the branch office)
7. Get hired and begin a rewarding career in healthcare security!

Common Mistakes

- Filling out the document yourself (it must be completed and stamped by a Doctor in Ontario)
- Photocopying or not using original documents
- Using someone else's records
- Applying for healthcare work without completed immunization records
- Only getting one dose of MMR, TB, or Varicella (2 are required)
